discovery in Dentistry.

THE GREATEST ADVANCE STEP EVER MADE IN THE ART.

The main difficulty in wearing artificial teeth is, they do not hold in their place firmly enough, and add to this the annoyance of food getting a der the plate while cating. I have discovered a method of so constructing the plate on which the teeth are set that they will not start or drop while cating or speaking, neither will any particles of food get under the plate, no matter what the condition of the mouth is, thich is not true of any method hithertoused.

I have secured Letters Patent for the United
